

COURSE TITLE: Engineering Research and Design

TEACHER NAME: Mr. Travis Hodges

E-MAIL: [thodges@forsyth.k12.ga.us](mailto:thodges@forsyth.k12.ga.us)

ROOM: 183

PHONE: 770-781-2264

EXT: 100183

### **Forsyth County Schools Course Syllabus 2022/2023**

**Course Description:** Engineering Research & Design is the fourth level engineering course at SFHS. This advanced course of study in the engineering field is only available for students who have completed the engineering pathway. Students conduct research and/or design an engineering project. Students sharpen their aptitude and expand their interest through experiences in the field of engineering. The course enables them to make an informed career choice through the study, application and practice of mechanical, electrical and other engineering systems. Projects will reinforce the application of communication, mathematics and science. CAD program will be used extensively in this course to enable students to visualize, solve and report on complex design problems.

**Standards:** Forsyth County offers many State Board of Education approved CTAE Career Pathways with three sequenced courses. *Engineering Research and Design is the Fourth Elective Course of the Engineering Pathway, after pathway completion.*

#### **Standards: Georgia State Career Pathways Standards "Engineering Research & Design"**

ENGR-RDPM1 – Students will become proficient in the formal research techniques necessary to understand a technical problem.

ENGR-RDPM2 – Students will use research techniques to develop a design solution for to a technological problem.

ENGR-RDPM3 – Students will utilize research techniques to test and evaluate designed prototypes.

ENGR-RDPM4 – Students will effectively communicate research findings.

Standard 1 in all CTAE courses is to demonstrate employability skills required by business and industry. This includes communication, demonstrating creativity, exhibiting critical thinking and problem-solving skills, modeling work readiness traits required for success in the workplace, and applying the appropriate skill sets to be productive in the workplace. Standard 1 also places emphasis on presenting a professional image through appearance, behavior, and language.

Updated July 2022 dp

**CTSO Affiliation (Career Tech Student Organizations):** CTSOs are co-curricular organizations with leadership programs and competitive events which reflect current curriculum standards and competencies for the instructional programs they serve. Teachers infuse CTSO activities into the instructional activities, thereby helping students see the real world value of their academic studies. The CTSO for this course appears below, and students are encouraged to take advantage of these additional leadership opportunities.

**FIRST Robotics:** The mission of FIRST Robotics is to inspire young people to be science and technology leaders and innovators, by engaging them in exciting mentor-based programs that build science, engineering, and technology skills, that inspire innovation, and that foster well-rounded life capabilities including self-confidence, communication, and leadership.

**TSA:** The mission of the Technology Student Association is learning to lead in a technical world. TSA enhances personal development, leadership, and career opportunities in STEM, whereby members apply and integrate these concepts through intracurricular activities, competitions, and related programs.

**VEX:** VEX, we envision a world where every student has the opportunity to be inspired by the excitement of hands-on, minds-on STEM learning and the feeling of creating something with technology. Here are some other amazing effects of teaching and learning with educational robotics.

**Electrathon Car:** The mission of Electrathon America is to provide hands on opportunities for participants to learn about STEM principles as they design and build an electric vehicle for competition.

**BEST Robotics:** Through participation in this project-based STEM program, students learn to analyze and solve problems utilizing the Engineering Design Process, which helps them develop technological literacy skills. It is these skills that industry seeks in its workforce.

**Required Assignments:** Foundations of Engineering will require students to demonstrate proficiency based on summative, formative assessments and class based projects.

**Availability for Extra Help:** Extra help is available before school, after school and during Tutorial hours.

**Makeup Work:** Make up work is defined as work assigned during a student's absence, not work assigned prior to an absence. The student has five (5) school days upon returning to school to complete make-up work. The teacher has the discretion to grant a longer period to make up work, if there are extenuating circumstances.

#### **Grading Calculations:**

**Non-EOC Course Average** = 50% (1st Sem. Course Work) + 50% (2nd Sem. Course Work)

1st and 2nd Semester Course Work = 75% Summative + 25% Formative

#### **Grading Policy:**

A = 90 – 100

B = 80 – 89

C = 70 – 79

Failing = Below 70

Formative Assessments include, but are not limited to homework, class work, practice tests, rough drafts, and sections of projects/ research papers/presentations.

Summative Assessments include, but are not limited to unit tests, final projects, final essays, final research papers, and final presentations.

**Learning Resources/Textbook(s):** All learning resources, both print and digital, are meant to support and enhance the student learning experience of this class. Below are the names of the textbooks and websites that will be

used in this course. Some of the web-based resources require parent permission per federal regulations. Federal laws that guide parent permission requirements are as follows:

- **Children's Internet Protection Act (CIPA):** The school is required by CIPA to have technology measures and policies in place that protect students from harmful materials including those that are obscene and pornographic. Any harmful content contained within inappropriate sites will be blocked.  
<http://fcc.gov/cgb/consumerfacts/cipa.html>
- **Children's Online Privacy Protection Act (COPPA):** COPPA applies to commercial companies and limits their ability to collect personal information from children under 13 years of age. No personal student information is collected for commercial purposes. <https://www.ftc.gov/tips-advice/business-center/guidance/complying-coppa-frequently-asked-questions-0>
- **Family Educational Rights and Privacy Act (FERPA):** FERPA protects the privacy of student education records and gives parents the right to review records. Under FERPA, schools may disclose directory information in certain circumstances.  
<http://www2.ed.gov/policy/gen/guid/fpco/ferpa>

Please review the resource list. Each website related to the curriculum resources is provided along with their privacy policies. Should you have any questions regarding these resources immediately contact the course teacher via email or phone.

Updated July 2022 dp

**Dress for Success:** Career and technical education pathways in Forsyth County incorporate Dress for Success Days throughout the school year. These experiences allow students to foster confidence and continue to develop a positive self-image, while understanding the importance of dressing well for their future profession. At certain intervals throughout the course, students will analyze industry standards of the profession and study the importance of dressing well for a job interview. This will culminate into being fully prepared for Community Mock Interviews which occur as students complete a career pathway.

**Industry Credentialing/Credentials of Value (EOPA):** Students are encouraged to select a career pathway beginning in the ninth or tenth grade that is connected to college and career goals. This course is one of three courses in the career pathway chosen by a student. At the conclusion of the third pathway course, students will be required to take an industry credentialing assessment. This assessment provides students an opportunity to demonstrate what they have learned by completing an online, nationally recognized exam and allows students the ability to earn a FCS Pathway Medallion and State Career Pathway Diploma Seals upon graduation. Student directory information may be shared with credentialing vendors offering the assessment.

The rigorous/technical coursework that you have been taking or will take in future years will provide you the foundational knowledge you will need for this exam. Your teacher will provide you the testing details and share the study guide and resources that are available to also assist you in preparation for this industry certification exam.

<b>Credential of Value (EOPA) Assessment Name:</b> Engineering Assessment (State Developed), Test Code: 7773
